

# ITWS2 Project- Image Journal

Onkar Verma (201501028) and Raghav Gupta (201501192)

May 2016

This web application is built on Web2py framework. Our main aim is to create a image sharing website, where users could upload their pictures, comment on other's pictures.

We have tried to incorporate the following features into our application.

1. Image Upload
2. Profile update
3. Comment on image.
4. Tag other users into the image
5. Report images of obscence type
6. Moderator, to remove such images, or remarks, or tags
7. Search images based on author, tags, title
8. 5 kinds of emotion to be expressed by a user
9. Profile page of a user.(likes, tags, uploads)
